SUMMARY

Results-driven Full Stack Developer (3+ years experience) specializing in React, Next.js, Node.js, Cloud Deployment, and AI integrations. Proven ability to design scalable architectures, build real-time applications, integrate Web3 and fintech APIs, and deploy production-grade systems on cloud infrastructure. Strong foundation in DevOps, AWS, networking fundamentals, and modern CI/CD workflows. Passionate about building high-performance products and adopting emerging technologies.

WORK EXPERIENCE

Full Stack Developer

Exitech.org, Apr 2025 – Now

Designed system architecture diagrams and optimized application workflows.
Built responsive production-grade web applications using React.js + Supabase.
Developed real-time chat applications using PostgreSQL and WebSocket-based communication.
Integrated Shopify APIs, webhooks and payment gateway in the app and added apis to synch the data in the app and in the Shopify.
Implemented scrapping of an app to automate the process of placing orders and gathering the results.
Refactored already existing codes to make it fast and broke the code into small components to make it more readable.

Full Stack Developer

Antematter.io, Jan 2024 – Apr 2025

Developed and maintained a React SDK used across multiple internal projects.
Integrated third-party APIs and fintech tools including Plaid, Vizgo, Dynamic.
Built SEO-optimized websites using Next.js + Tailwind CSS and deployed on Vercel.
Integrated blockchain smart contracts using Ethers.js, Web3.js, Wagmi.
Implemented secure file storage using AWS S3 Buckets.
Developed scalable backend services in Node.js integrated with MongoDB, Supabase, PostgreSQL.
Wrote automated frontend and backend tests using Jest.
Followed Git-based workflows with code reviews and CI pipelines.

Lead Full Stack Developer

Soltridge, June 2023 – Sept

Converted complex Figma UI/UX designs into high-performance React applications.
Led frontend architecture and API integration tasks.
Deployed production apps on AWS Amplify and Vercel.
Mentored junior developers and conducted Git/GitHub workflow training sessions.
Improved development efficiency through standardized branching strategies.

Java Mobile App Development Instructor

CENiT, June 2023 – Sept

Trained students in Java-based Android application development, covering core concepts such as activities, intents, layouts, API integration, and database usage.
Mentored students through hands-on projects, enabling them to design, build, debug, and deploy functional mobile applications independently.
Improved students' problem-solving and coding skills by teaching clean code practices, debugging techniques, and real-world development workflows.

Web Teaching Assistant

FAST NUCES, August 2023 – Dec

Assisted faculty with grading assignments and evaluations.
Supported students with modern web development technologies including React and backend APIs.
Provided debugging support and best-practice coding guidance.

Freelance Full Stack Developer

Fiverr/Upwork, Jun 2020

Delivered multiple client projects including bug fixes, feature development, and optimization.

Integrated Stripe payment gateway in Next.js e-commerce projects.

Built AI-powered applications using OpenAI API (DALL·E 3 image generation).

Deployed full-stack applications on Ubuntu VPS and Virtual Private Cloud (VPC) environments.

EDUCATION

BS Computer Science

Aug 2019 – Dec 2023

FAST-NUCES, Islamabad

Microsoft. Certified: Azure Fundamentals

2023

Microsoft Azure

SKILLS

Programming Languages	TypeScript, JavaScript, Python, C/C++, Java, PHP
Frameworks/Libraries	Next.js, React.js, Node.js, Express.js, Flask, Tailwind CSS
Databases	MongoDB, PostgreSQL, MySQL
Cloud	AWS (EC2, S3, Lambda), Azure, Firebase, VPS (Vultr), Supabase
DevOps	Docker, Git, GitHub, GitHub Actions, Kubernetes, CI/CD Pipeline, AWS CDK
Tools	Linux, PM2, Prisma, Mongoose, VS Code, Cursor, Claude-code ChatGPT, LaTeX
